# MAN OVERBOARD

Yes—I have heard "Man overboard!" a good many times since I was a boy, and once or twice I have seen the man go. There are more men lost in that way than passengers on ocean steamers ever learn of. I have stood looking over the rail on a dark night, when there was a step beside me, and something flew past my head like a big black bat—and then there was a splash! Stokers often go like that. They go mad with the heat, and they slip up on deck and are gone before anybody can stop them, often without being seen or heard. Now and then a passenger will do it, but he generally has what he thinks a pretty good reason. I have seen a man empty his revolver into a crowd of emigrants forward, and then go over like a rocket. Of course, any officer who respects himself will do what he can to pick a man up, if the weather is not so heavy that he would have to risk his ship; but I don't think I remember seeing a man come back when he was once fairly gone more than two or three times in all my life, though we have often picked up the life-buoy, and sometimes the fellow's cap. Stokers and passengers jump over; I never knew a sailor to do that, drunk or sober. Yes, they say it has happened on hard ships, but I never knew a case myself. Once in a long time a man is fished out when it is just too late, and dies in the boat before you can get him aboard, and—well, I don't know that I ever told that story since it happened—I knew a fellow who went over, and came back dead. I didn't see him after he came back; only one of us did, but we all knew he was there.

No, I am not giving you "sharks." There isn't a shark in this story, and I don't know that I would tell it at all if we weren't alone, just you and I. But you and I have seen things in various parts, and maybe you will understand. Anyhow, you know that I am telling what I know about, and nothing else; and it has been on my mind to tell you ever since it happened, only there hasn't been a chance.

It's a long story, and it took some time to happen; and it began a good many years ago, in October, as well as I can remember. I was mate then; I passed the local Marine Board for master about three years later. She was the *Helen B. Jackson*, of New York, with lumber for the West Indies, four-masted schooner, Captain Hackstaff. She was an old-fashioned one, even then—no steam donkey, and all to do by hand. There were still sailors in the coasting trade in those days, you remember. She wasn't a hard ship, for the old man was better than most of them, though he kept to himself and had a face like a monkey-wrench. We were

thirteen, all told, in the ship's company; and some of them afterwards thought that might have had something to do with it, but I had all that nonsense knocked out of me when I was a boy. I don't mean to say that I like to go to sea on a Friday, but I *have* gone to sea on a Friday, and nothing has happened; and twice before that we have been thirteen, because one of the hands didn't turn up at the last minute, and nothing ever happened either—nothing worse than the loss of a light spar or two, or a little canvas. Whenever I have been wrecked, we had sailed as cheerily as you please—no thirteens, no Fridays, no dead men in the hold. I believe it generally happens that way.

I dare say you remember those two Benton boys that were so much alike? It is no wonder, for they were twin brothers. They shipped with us as boys on the old *Boston Belle*, when you were mate and I was before the mast. I never was quite sure which was which of those two, even then; and when they both had beards it was harder than ever to tell them apart. One was Jim, and the other was Jack; James Benton and John Benton. The only difference I ever could see was, that one seemed to be rather more cheerful and inclined to talk than the other; but one couldn't even be sure of that. Perhaps they had moods. Anyhow, there was one of them that used to whistle when he was alone. He only knew one tune, and that was "Nancy Lee," and the other didn't know any tune at all; but I may be mistaken about that, too. Perhaps they both knew it.

Well, those two Benton boys turned up on board the *Helen B. Jackson*. They had been on half a dozen ships since the *Boston Belle*, and they had grown up and were good seamen. They had reddish beards and bright blue eyes and freckled faces; and they were quiet fellows, good workmen on rigging, pretty willing, and both good men at the wheel. They managed to be in the same watch—it was the port watch on the *Helen B.*, and that was mine, and I had great confidence in them both. If there was any job aloft that needed two hands, they were always the first to jump into the rigging; but that doesn't often happen on a fore-and-aft schooner. If it breezed up, and the jibtopsail was to be taken in, they never minded a wetting, and they would be out at the bowsprit end before there was a hand at the downhaul. The men liked them for that, and because they didn't blow about what they could do. I remember one day in a reefing job, the downhaul parted and came down on deck from the peak of the spanker. When the weather moderated, and we shook the reefs out, the downhaul was forgotten until we happened to think we might soon need it again. There was some sea on, and the boom was off and the gaff was slamming. One of those Benton boys was at the wheel, and before I knew what he was doing, the other was out on the gaff with

the end of the new downhaul, trying to reeve it through its block. The one who was steering watched him, and got as white as cheese. The other one was swinging about on the gaff end, and every time she rolled to leeward he brought up with a jerk that would have sent anything but a monkey flying into space. But he didn't leave it until he had rove the new rope, and he got back all right. I think it was Jack at the wheel; the one that seemed more cheerful, the one that whistled "Nancy Lee." He had rather have been doing the job himself than watch his brother do it, and he had a scared look; but he kept her as steady as he could in the swell, and he drew a long breath when Jim had worked his way back to the peak-halliard block, and had something to hold on to. I think it was Jim.

They had good togs, too, and they were neat and clean men in the forecastle. I knew they had nobody belonging to them ashore,—no mother, no sisters, and no wives; but somehow they both looked as if a woman overhauled them now and then. I remember that they had one ditty bag between them, and they had a woman's thimble in it. One of the men said something about it to them, and they looked at each other; and one smiled, but the other didn't. Most of their clothes were alike, but they had one red guernsey between them. For some time I used to think it was always the same one that wore it, and I thought that might be a way to tell them apart. But then I heard one asking the other for it, and saying that the other had worn it last. So that was no sign either. The cook was a West Indiaman, called James Lawley; his father had been hanged for putting lights in cocoanut trees where they didn't belong. But he was a good cook, and knew his business; and it wasn't soup-and-bully and dog's-body every Sunday. That's what I meant to say. On Sunday the cook called both those boys Jim, and on week-days he called them Jack. He used to say he must be right sometimes if he did that, because even the hands on a painted clock point right twice a day.

What started me to trying for some way of telling the Bentons apart was this. I heard them talking about a girl. It was at night, in our watch, and the wind had headed us off a little rather suddenly, and when we had flattened in the jibs, we clewed down the topsails, while the two Benton boys got the spanker sheet aft. One of them was at the helm. I coiled down the mizzen-topsail downhaul myself, and was going aft to see how she headed up, when I stopped to look at a light, and leaned against the deck-house. While I was standing there I heard the two boys talking. It sounded as if they had talked of the same thing before, and as far as I could tell, the voice I heard first belonged to the one who wasn't quite so cheerful as the other,—the one who was Jim when one knew which he was.

"Does Mamie know?" Jim asked.

"Not yet," Jack answered quietly. He was at the wheel. "I mean to tell her next time we get home."

"All right."

That was all I heard, because I didn't care to stand there listening while they were talking about their own affairs; so I went aft to look into the binnacle, and I told the one at the wheel to keep her so as long as she had way on her, for I thought the wind would back up again before long, and there was land to leeward. When he answered, his voice, somehow, didn't sound like the cheerful one. Perhaps his brother had relieved the wheel while they had been speaking, but what I had heard set me wondering which of them it was that had a girl at home. There's lots of time for wondering on a schooner in fair weather.

After that I thought I noticed that the two brothers were more silent when they were together. Perhaps they guessed that I had overheard something that night, and kept quiet when I was about. Some men would have amused themselves by trying to chaff them separately about the girl at home, and I suppose whichever one it was would have let the cat out of the bag if I had done that. But, somehow, I didn't like to. Yes, I was thinking of getting married myself at that time, so I had a sort of fellow-feeling for whichever one it was, that made me not want to chaff him.

They didn't talk much, it seemed to me; but in fair weather, when there was nothing to do at night, and one was steering, the other was everlastingly hanging round as if he were waiting to relieve the wheel, though he might have been enjoying a quiet nap for all I cared in such weather. Or else, when one was taking his turn at the lookout, the other would be sitting on an anchor beside him. One kept near the other, at night more than in the daytime. I noticed that. They were fond of sitting on that anchor, and they generally tucked away their pipes under it, for the *Helen B.* was a dry boat in most weather, and like most fore-and-afters was better on a wind than going free. With a beam sea we sometimes shipped a little water aft. We were by the stern, anyhow, on that voyage, and that is one reason why we lost the man.

We fell in with a southerly gale, south-east at first; and then the barometer began to fall while you could watch it, and a long swell began to come up from the south'ard. A couple of months earlier we might have been in for a cyclone, but it's "October all over" in those waters, as you know better than I. It was just going to blow, and then it was going to rain, that was all; and we had plenty of

time to make everything snug before it breezed up much. It blew harder after sunset, and by the time it was quite dark it was a full gale. We had shortened sail for it, but as we were by the stern we were carrying the spanker close reefed instead of the storm trysail. She steered better so, as long as we didn't have to heave to. I had the first watch with the Benton boys, and we had not been on deck an hour when a child might have seen that the weather meant business.

The old man came up on deck and looked round, and in less than a minute he told us to give her the trysail. That meant heaving to, and I was glad of it; for though the *Helen B.* was a good vessel enough, she wasn't a new ship by a long way, and it did her no good to drive her in that weather. I asked whether I should call all hands, but just then the cook came aft, and the old man said he thought we could manage the job without waking the sleepers, and the trysail was handy on deck already, for we hadn't been expecting anything better. We were all in oilskins, of course, and the night was as black as a coal mine, with only a ray of light from the slit in the binnacle shield, and you couldn't tell one man from another except by his voice. The old man took the wheel; we got the boom amidships, and he jammed her into the wind until she had hardly any way. It was blowing now, and it was all that I and two others could do to get in the slack of the downhaul, while the others lowered away at the peak and throat, and we had our hands full to get a couple of turns round the wet sail. It's all child's play on a fore-and-after compared with reefing topsails in anything like weather, but the gear of a schooner sometimes does unhandy things that you don't expect, and those everlasting long halliards get foul of everything if they get adrift. I remember thinking how unhandy that particular job was. Somebody unhooked the throat-halliard block, and thought he had hooked it into the head-crinkle of the trysail, and sang out to hoist away, but he had missed it in the dark, and the heavy block went flying into the lee rigging, and nearly killed him when it swung back with the weather roll. Then the old man got her up in the wind until the jib was shaking like thunder; then he held her off, and she went off as soon as the head-sails filled, and he couldn't get her back again without the spanker. Then the *Helen B.* did her favourite trick, and before we had time to say much we had a sea over the quarter and were up to our waists, with the parrels of the trysail only half becketed round the mast, and the deck so full of gear that you couldn't put your foot on a plank, and the spanker beginning to get adrift again, being badly stopped, and the general confusion and hell's delight that you can only have on a fore-and-after when there's nothing really serious the matter. Of course, I don't mean to say that the old man couldn't have steered his trick as well as you or I or any other seaman; but I don't believe he had ever been on

board the *Helen B.* before, or had his hand on her wheel till then; and he didn't know her ways. I don't mean to say that what happened was his fault. I don't know whose fault it was. Perhaps nobody was to blame. But I knew something happened somewhere on board when we shipped that sea, and you'll never get it out of my head. I hadn't any spare time myself, for I was becketing the rest of the trysail to the mast. We were on the starboard tack, and the throat-halliard came down to port as usual, and I suppose there were at least three men at it, hoisting away, while I was at the becket.

Now I am going to tell you something. You have known me, man and boy, several voyages; and you are older than I am; and you have always been a good friend to me. Now, do you think I am the sort of man to think I hear things where there isn't anything to hear, or to think I see things when there is nothing to see? No, you don't. Thank you. Well now, I had passed the last becket, and I sang out to the men to sway away, and I was standing on the jaws of the spanker-gaff, with my left hand on the bolt-rope of the trysail, so that I could feel when it was board-taut, and I wasn't thinking of anything except being glad the job was over, and that we were going to heave her to. It was as black as a coal-pocket, except that you could see the streaks on the seas as they went by, and abaft the deck-house I could see the ray of light from the binnacle on the captain's yellow oilskin as he stood at the wheel—or rather I might have seen it if I had looked round at that minute. But I didn't look round. I heard a man whistling. It was "Nancy Lee," and I could have sworn that the man was right over my head in the crosstrees. Only somehow I knew very well that if anybody could have been up there, and could have whistled a tune, there were no living ears sharp enough to hear it on deck then. I heard it distinctly, and at the same time I heard the real whistling of the wind in the weather rigging, sharp and clear as the steam-whistle on a Dago's peanut-cart in New York. That was all right, that was as it should be; but the other wasn't right; and I felt queer and stiff, as if I couldn't move, and my hair was curling against the flannel lining of my sou'wester, and I thought somebody had dropped a lump of ice down my back.

I said that the noise of the wind in the rigging was real, as if the other wasn't, for I felt that it wasn't, though I heard it. But it was, all the same; for the captain heard it, too. When I came to relieve the wheel, while the men were clearing up decks, he was swearing. He was a quiet man, and I hadn't heard him swear before, and I don't think I did again, though several queer things happened after that. Perhaps he said all he had to say then; I don't see how he could have said anything more. I used to think nobody could swear like a Dane, except a

Neapolitan or a South American; but when I had heard the old man I changed my mind. There's nothing afloat or ashore that can beat one of your quiet American skippers, if he gets off on that tack. I didn't need to ask him what was the matter, for I knew he had heard "Nancy Lee," as I had, only it affected us differently.

He did not give me the wheel, but told me to go forward and get the second bonnet off the staysail, so as to keep her up better. As we tailed on to the sheet when it was done, the man next me knocked his sou'wester off against my shoulder, and his face came so close to me that I could see it in the dark. It must have been very white for me to see it, but I only thought of that afterwards. I don't see how any light could have fallen upon it, but I knew it was one of the Benton boys. I don't know what made me speak to him. "Hullo, Jim! Is that you?" I asked. I don't know why I said Jim, rather than Jack.

"I am Jack," he answered. We made all fast, and things were much quieter.

"The old man heard you whistling 'Nancy Lee,' just now," I said, "and he didn't like it."

It was as if there were a white light inside his face, and it was ghastly. I know his teeth chattered. But he didn't say anything, and the next minute he was somewhere in the dark trying to find his sou'wester at the foot of the mast.

When all was quiet, and she was hove to, coming to and falling off her four points as regularly as a pendulum, and the helm lashed a little to the lee, the old man turned in again, and I managed to light a pipe in the lee of the deck-house, for there was nothing more to be done till the gale chose to moderate, and the ship was as easy as a baby in its cradle. Of course the cook had gone below, as he might have done an hour earlier; so there were supposed to be four of us in the watch. There was a man at the lookout, and there was a hand by the wheel, though there was no steering to be done, and I was having my pipe in the lee of the deck-house, and the fourth man was somewhere about decks, probably having a smoke too. I thought some skippers I had sailed with would have called the watch aft, and given them a drink after that job, but it wasn't cold, and I guessed that our old man wouldn't be particularly generous in that way. My hands and feet were red-hot, and it would be time enough to get into dry clothes when it was my watch below; so I stayed where I was, and smoked. But by and by, things being so quiet, I began to wonder why nobody moved on deck; just that sort of restless wanting to know where every man is that one sometimes

feels in a gale of wind on a dark night. So when I had finished my pipe I began to move about. I went aft, and there was a man leaning over the wheel, with his legs apart and both hands hanging down in the light from the binnacle, and his sou'wester over his eyes. Then I went forward, and there was a man at the lookout, with his back against the foremast, getting what shelter he could from the staysail. I knew by his small height that he was not one of the Benton boys. Then I went round by the weather side, and poked about in the dark, for I began to wonder where the other man was. But I couldn't find him, though I searched the decks until I got right aft again. It was certainly one of the Benton boys that was missing, but it wasn't like either of them to go below to change his clothes in such warm weather. The man at the wheel was the other, of course. I spoke to him.

"Jim, what's become of your brother?"

"I am Jack, sir."

"Well, then, Jack, where's Jim? He's not on deck."

"I don't know, sir."

When I had come up to him he had stood up from force of instinct, and had laid his hands on the spokes as if he were steering, though the wheel was lashed; but he still bent his face down, and it was half hidden by the edge of his sou'wester, while he seemed to be staring at the compass. He spoke in a very low voice, but that was natural, for the captain had left his door open when he turned in, as it was a warm night in spite of the storm, and there was no fear of shipping any more water now.

"What put it into your head to whistle like that, Jack? You've been at sea long enough to know better."

He said something, but I couldn't hear the words; it sounded as if he were denying the charge.

"Somebody whistled," I said.

He didn't answer, and then, I don't know why, perhaps because the old man hadn't given us a drink, I cut half an inch off the plug of tobacco I had in my oilskin pocket, and gave it to him. He knew my tobacco was good, and he shoved it into his mouth with a word of thanks. I was on the weather side of the wheel.

"Go forward and see if you can find Jim," I said.

He started a little, and then stepped back and passed behind me, and was going along the weather side. Maybe his silence about the whistling had irritated me, and his taking it for granted that because we were hove to and it was a dark night, he might go forward any way he pleased. Anyhow, I stopped him, though I spoke good-naturedly enough.

"Pass to leeward, Jack," I said.

He didn't answer, but crossed the deck between the binnacle and the deck-house to the lee side. She was only falling off and coming to, and riding the big seas as easily as possible, but the man was not steady on his feet and reeled against the corner of the deck-house and then against the lee rail. I was quite sure he couldn't have had anything to drink, for neither of the brothers were the kind to hide rum from their shipmates, if they had any, and the only spirits that were aboard were locked up in the captain's cabin. I wondered whether he had been hit by the throat-halliard block and was hurt.

I left the wheel and went after him, but when I got to the corner of the deck-house I saw that he was on a full run forward, so I went back. I watched the compass for a while, to see how far she went off, and she must have come to again half a dozen times before I heard voices, more than three or four, forward; and then I heard the little West Indies cook's voice, high and shrill above the rest:

—

"Man overboard!"

There wasn't anything to be done, with the ship hove-to and the wheel lashed. If there was a man overboard, he must be in the water right alongside. I couldn't imagine how it could have happened, but I ran forward instinctively. I came upon the cook first, half-dressed in his shirt and trousers, just as he had tumbled out of his bunk. He was jumping into the main rigging, evidently hoping to see the man, as if any one could have seen anything on such a night, except the foam-streaks on the black water, and now and then the curl of a breaking sea as it went away to leeward. Several of the men were peering over the rail into the dark. I caught the cook by the foot, and asked who was gone.

"It's Jim Benton," he shouted down to me. "He's not aboard this ship!"

There was no doubt about that. Jim Benton was gone; and I knew in a flash that

he had been taken off by that sea when we were setting the storm trysail. It was nearly half an hour since then; she had run like wild for a few minutes until we got her hove-to, and no swimmer that ever swam could have lived as long as that in such a sea. The men knew it as well as I, but still they stared into the foam as if they had any chance of seeing the lost man. I let the cook get into the rigging and joined the men, and asked if they had made a thorough search on board, though I knew they had and that it could not take long, for he wasn't on deck, and there was only the forecastle below.

"That sea took him over, sir, as sure as you're born," said one of the men close beside me.

We had no boat that could have lived in that sea, of course, and we all knew it. I offered to put one over, and let her drift astern two or three cable's-lengths by a line, if the men thought they could haul me aboard again; but none of them would listen to that, and I should probably have been drowned if I had tried it, even with a life-belt; for it was a breaking sea. Besides, they all knew as well as I did that the man could not be right in our wake. I don't know why I spoke again. "Jack Benton, are you there? Will you go if I will?"

"No, sir," answered a voice; and that was all.

By that time the old man was on deck, and I felt his hand on my shoulder rather roughly, as if he meant to shake me.

"I'd reckoned you had more sense, Mr. Torkeldsen," he said. "God knows I would risk my ship to look for him, if it were any use; but he must have gone half an hour ago."

He was a quiet man, and the men knew he was right, and that they had seen the last of Jim Benton when they were bending the trysail—if anybody had seen him then. The captain went below again, and for some time the men stood around Jack, quite near him, without saying anything, as sailors do when they are sorry for a man and can't help him; and then the watch below turned in again, and we were three on deck.

Nobody can understand that there can be much consolation in a funeral, unless he has felt that blank feeling there is when a man's gone overboard whom everybody likes. I suppose landsmen think it would be easier if they didn't have to bury their fathers and mothers and friends; but it wouldn't be. Somehow the funeral keeps up the idea of something beyond. You may believe in that

something just the same; but a man who has gone in the dark, between two seas, without a cry, seems much more beyond reach than if he were still lying on his bed, and had only just stopped breathing. Perhaps Jim Benton knew that, and wanted to come back to us. I don't know, and I am only telling you what happened, and you may think what you like.

Jack stuck by the wheel that night until the watch was over. I don't know whether he slept afterwards, but when I came on deck four hours later, there he was again, in his oilskins, with his sou'wester over his eyes, staring into the binnacle. We saw that he would rather stand there, and we left him alone. Perhaps it was some consolation to him to get that ray of light when everything was so dark. It began to rain, too, as it can when a southerly gale is going to break up, and we got every bucket and tub on board, and set them under the booms to catch the fresh water for washing our clothes. The rain made it very thick, and I went and stood under the lee of the staysail, looking out. I could tell that day was breaking, because the foam was whiter in the dark where the seas crested, and little by little the black rain grew grey and steamy, and I couldn't see the red glare of the port light on the water when she went off and rolled to leeward. The gale had moderated considerably, and in another hour we should be under way again. I was still standing there when Jack Benton came forward. He stood still a few minutes near me. The rain came down in a solid sheet, and I could see his wet beard and a corner of his cheek, too, grey in the dawn. Then he stooped down and began feeling under the anchor for his pipe. We had hardly shipped any water forward, and I suppose he had some way of tucking the pipe in, so that the rain hadn't floated it off. Presently he got on his legs again, and I saw that he had two pipes in his hand. One of them had belonged to his brother, and after looking at them a moment I suppose he recognised his own, for he put it in his mouth, dripping with water. Then he looked at the other fully a minute without moving. When he had made up his mind, I suppose, he quietly chucked it over the lee rail, without even looking round to see whether I was watching him. I thought it was a pity, for it was a good wooden pipe, with a nickel ferrule, and somebody would have been glad to have it. But I didn't like to make any remark, for he had a right to do what he pleased with what had belonged to his dead brother. He blew the water out of his own pipe, and dried it against his jacket, putting his hand inside his oilskin; he filled it, standing under the lee of the foremast, got a light after wasting two or three matches, and turned the pipe upside down in his teeth, to keep the rain out of the bowl. I don't know why I noticed everything he did, and remember it now; but somehow I felt sorry for him, and I kept wondering whether there was anything I could say that would

make him feel better. But I didn't think of anything, and as it was broad daylight I went aft again, for I guessed that the old man would turn out before long and order the spanker set and the helm up. But he didn't turn out before seven bells, just as the clouds broke and showed blue sky to leeward—"the Frenchman's barometer," you used to call it.

Some people don't seem to be so dead, when they are dead, as others are. Jim Benton was like that. He had been on my watch, and I couldn't get used to the idea that he wasn't about decks with me. I was always expecting to see him, and his brother was so exactly like him that I often felt as if I did see him and forgot he was dead, and made the mistake of calling Jack by his name; though I tried not to, because I knew it must hurt. If ever Jack had been the cheerful one of the two, as I had always supposed he had been, he had changed very much, for he grew to be more silent than Jim had ever been.

One fine afternoon I was sitting on the main-hatch, overhauling the clock-work of the taffrail-log, which hadn't been registering very well of late, and I had got the cook to bring me a coffee-cup to hold the small screws as I took them out, and a saucer for the sperm-oil I was going to use. I noticed that he didn't go away, but hung round without exactly watching what I was doing, as if he wanted to say something to me. I thought if it were worth much he would say it anyhow, so I didn't ask him questions; and sure enough he began of his own accord before long. There was nobody on deck but the man at the wheel, and the other man away forward.

"Mr. Torkeldsen," the cook began, and then stopped.

I supposed he was going to ask me to let the watch break out a barrel of flour, or some salt horse.

"Well, doctor?" I asked, as he didn't go on.

"Well, Mr. Torkeldsen," he answered, "I somehow want to ask you whether you think I am giving satisfaction on this ship, or not?"

"So far as I know, you are, doctor. I haven't heard any complaints from the fore-castle, and the captain has said nothing, and I think you know your business, and the cabin-boy is bursting out of his clothes. That looks as if you are giving satisfaction. What makes you think you are not?"

I am not good at giving you that West Indies talk, and sha'n't try; but the doctor

beat about the bush awhile, and then he told me he thought the men were beginning to play tricks on him, and he didn't like it, and thought he hadn't deserved it, and would like his discharge at our next port. I told him he was a d——d fool, of course, to begin with; and that men were more apt to try a joke with a chap they liked than with anybody they wanted to get rid of; unless it was a bad joke, like flooding his bunk, or filling his boots with tar. But it wasn't that kind of practical joke. The doctor said that the men were trying to frighten him, and he didn't like it, and that they put things in his way that frightened him. So I told him he was a d——d fool to be frightened, anyway, and I wanted to know what things they put in his way. He gave me a queer answer. He said they were spoons and forks, and odd plates, and a cup now and then, and such things.

I set down the taffrail-log on the bit of canvas I had put under it, and looked at the doctor. He was uneasy, and his eyes had a sort of hunted look, and his yellow face looked grey. He wasn't trying to make trouble. He was in trouble. So I asked him questions.

He said he could count as well as anybody, and do sums without using his fingers, but that when he couldn't count any other way he did use his fingers, and it always came out the same. He said that when he and the cabin-boy cleared up after the men's meals there were more things to wash than he had given out. There'd be a fork more, or there'd be a spoon more, and sometimes there'd be a spoon and a fork, and there was always a plate more. It wasn't that he complained of that. Before poor Jim Benton was lost they had a man more to feed, and his gear to wash up after meals, and that was in the contract, the doctor said. It would have been if there were twenty in the ship's company; but he didn't think it was right for the men to play tricks like that. He kept his things in good order, and he counted them, and he was responsible for them, and it wasn't right that the men should take more things than they needed when his back was turned, and just soil them and mix them up with their own, so as to make him think—

He stopped there, and looked at me, and I looked at him. I didn't know what he thought, but I began to guess. I wasn't going to humour any such nonsense as that, so I told him to speak to the men himself, and not come bothering me about such things.

"Count the plates and forks and spoons before them when they sit down to table, and tell them that's all they'll get; and when they have finished, count the things again, and if the count isn't right, find out who did it. You know it must be one of

them. You're not a green hand; you've been going to sea ten or eleven years, and don't want any lesson about how to behave if the boys play a trick on you."

"If I could catch him," said the cook, "I'd have a knife into him before he could say his prayers."

Those West India men are always talking about knives, especially when they are badly frightened. I knew what he meant, and didn't ask him, but went on cleaning the brass cogwheels of the patent log and oiling the bearings with a feather. "Wouldn't it be better to wash it out with boiling water, sir?" asked the cook, in an insinuating tone. He knew that he had made a fool of himself, and was anxious to make it right again.

I heard no more about the odd platter and gear for two or three days, though I thought about his story a good deal. The doctor evidently believed that Jim Benton had come back, though he didn't quite like to say so. His story had sounded silly enough on a bright afternoon, in fair weather, when the sun was on the water, and every rag was drawing in the breeze, and the sea looked as pleasant and harmless as a cat that has just eaten a canary. But when it was toward the end of the first watch, and the waning moon had not risen yet, and the water was like still oil, and the jibs hung down flat and helpless like the wings of a dead bird—it wasn't the same then. More than once I have started then, and looked round when a fish jumped, expecting to see a face sticking up out of the water with its eyes shut. I think we all felt something like that at the time.

One afternoon we were putting a fresh service on the jib-sheet-pennant. It wasn't my watch, but I was standing by looking on. Just then Jack Benton came up from below, and went to look for his pipe under the anchor. His face was hard and drawn, and his eyes were cold like steel balls. He hardly ever spoke now, but he did his duty as usual, and nobody had to complain of him, though we were all beginning to wonder how long his grief for his dead brother was going to last like that. I watched him as he crouched down, and ran his hand into the hiding-place for the pipe. When he stood up, he had two pipes in his hand.

Now, I remembered very well seeing him throw one of those pipes away, early in the morning after the gale; and it came to me now, and I didn't suppose he kept a stock of them under the anchor. I caught sight of his face, and it was greenish white, like the foam on shallow water, and he stood a long time looking at the two pipes. He wasn't looking to see which was his, for I wasn't five yards from him as he stood, and one of those pipes had been smoked that day, and was shiny

where his hand had rubbed it, and the bone mouthpiece was chafed white where his teeth had bitten it. The other was water-logged. It was swelled and cracking with wet, and it looked to me as if there were a little green weed on it.

Jack Benton turned his head rather stealthily as I looked away, and then he hid the thing in his trousers pocket, and went aft on the lee side, out of sight. The men had got the sheet pennant on a stretch to serve it, but I ducked under it and stood where I could see what Jack did, just under the fore-staysail. He couldn't see me, and he was looking about for something. His hand shook as he picked up a bit of half-bent iron rod, about a foot long, that had been used for turning an eye-bolt, and had been left on the main-hatch. His hand shook as he got a piece of marline out of his pocket, and made the water-logged pipe fast to the iron. He didn't mean it to get adrift, either, for he took his turns carefully, and hove them taut and then rode them, so that they couldn't slip, and made the end fast with two half-hitches round the iron, and hitched it back on itself. Then he tried it with his hands, and looked up and down the deck furtively, and then quietly dropped the pipe and iron over the rail, so that I didn't even hear the splash. If anybody was playing tricks on board, they weren't meant for the cook.

I asked some questions about Jack Benton, and one of the men told me that he was off his feed, and hardly ate anything, and swallowed all the coffee he could lay his hands on, and had used up all his own tobacco and had begun on what his brother had left.

"The doctor says it ain't so, sir," said the man, looking at me shyly, as if he didn't expect to be believed; "the doctor says there's as much eaten from breakfast to breakfast as there was before Jim fell overboard, though there's a mouth less and another that eats nothing. I says it's the cabin-boy that gets it. He's bu'sting."

I told him that if the cabin-boy ate more than his share, he must work more than his share, so as to balance things. But the man laughed queerly, and looked at me again.

"I only said that, sir, just like that. We all know it ain't so."

"Well, how is it?"

"How is it?" asked the man, half-angry all at once. "I don't know how it is, but there's a hand on board that's getting his whack along with us as regular as the bells."

"Does he use tobacco?" I asked, meaning to laugh it out of him, but as I spoke I remembered the water-logged pipe.

"I guess he's using his own still," the man answered, in a queer, low voice. "Perhaps he'll take some one else's when his is all gone."

It was about nine o'clock in the morning, I remember, for just then the captain called to me to stand by the chronometer while he took his fore observation. Captain Hackstaff wasn't one of those old skippers who do everything themselves with a pocket watch, and keep the key of the chronometer in their waistcoat pocket, and won't tell the mate how far the dead reckoning is out. He was rather the other way, and I was glad of it, for he generally let me work the sights he took, and just ran his eye over my figures afterwards. I am bound to say his eye was pretty good, for he would pick out a mistake in a logarithm, or tell me that I had worked the "Equation of Time" with the wrong sign, before it seemed to me that he could have got as far as "half the sum, minus the altitude." He was always right, too, and besides he knew a lot about iron ships and local deviation, and adjusting the compass, and all that sort of thing. I don't know how he came to be in command of a fore-and-aft schooner. He never talked about himself, and maybe he had just been mate on one of those big steel square-riggers, and something had put him back. Perhaps he had been captain, and had got his ship aground, through no particular fault of his, and had to begin over again. Sometimes he talked just like you and me, and sometimes he would speak more like books do, or some of those Boston people I have heard. I don't know. We have all been shipmates now and then with men who have seen better days. Perhaps he had been in the Navy, but what makes me think he couldn't have been, was that he was a thorough good seaman, a regular old wind-jammer, and understood sail, which those Navy chaps rarely do. Why, you and I have sailed with men before the mast who had their master's certificates in their pockets,—English Board of Trade certificates, too,—who could work a double altitude if you would lend them a sextant and give them a look at the chronometer, as well as many a man who commands a big square-rigger. Navigation ain't everything, nor seamanship, either. You've got to have it in you, if you mean to get there.

I don't know how our captain heard that there was trouble forward. The cabin-boy may have told him, or the men may have talked outside his door when they relieved the wheel at night. Anyhow, he got wind of it, and when he had got his sight that morning he had all hands aft, and gave them a lecture. It was just the kind of talk you might have expected from him. He said he hadn't any complaint to make, and that so far as he knew everybody on board was doing his duty, and

that he was given to understand that the men got their whack, and were satisfied. He said his ship was never a hard ship, and that he liked quiet, and that was the reason he didn't mean to have any nonsense, and the men might just as well understand that, too. We'd had a great misfortune, he said, and it was nobody's fault. We had lost a man we all liked and respected, and he felt that everybody in the ship ought to be sorry for the man's brother, who was left behind, and that it was rotten lubberly childishness, and unjust and unmanly and cowardly, to be playing schoolboy tricks with forks and spoons and pipes, and that sort of gear. He said it had got to stop right now, and that was all, and the men might go forward. And so they did.

He let go of the knife, and the point stuck into the deck.  
**HE LET GO OF THE KNIFE, AND THE POINT STUCK INTO THE DECK.**

---

It got worse after that, and the men watched the cook, and the cook watched the men, as if they were trying to catch each other; but I think everybody felt that there was something else. One evening, at supper-time, I was on deck, and Jack came aft to relieve the wheel while the man who was steering got his supper. He hadn't got past the main-hatch on the lee side, when I heard a man running in slippers that slapped on the deck, and there was a sort of a yell and I saw the coloured cook going for Jack, with a carving-knife in his hand. I jumped to get between them, and Jack turned round short, and put out his hand. I was too far to reach them, and the cook jabbed out with his knife. But the blade didn't get anywhere near Benton. The cook seemed to be jabbing it into the air again and again, at least four feet short of the mark. Then he dropped his right hand, and I saw the whites of his eyes in the dusk, and he reeled up against the pin-rail, and caught hold of a belaying-pin with his left. I had reached him by that time, and grabbed hold of his knife-hand and the other too, for I thought he was going to use the pin; but Jack Benton was standing staring stupidly at him, as if he didn't understand. But instead, the cook was holding on because he couldn't stand, and his teeth were chattering, and he let go of the knife, and the point stuck into the deck.

"He's crazy!" said Jack Benton, and that was all he said; and he went aft.

When he was gone the cook began to come to and he spoke quite low, near my ear.

"There were two of them! So help me God, there were two of them!"

I don't know why I didn't take him by the collar, and give him a good shaking; but I didn't. I just picked up the knife and gave it to him, and told him to go back to his galley, and not to make a fool of himself. You see, he hadn't struck at Jack, but at something he thought he saw, and I knew what it was, and I felt that same thing, like a lump of ice sliding down my back, that I felt that night when we were bending the trysail.

When the men had seen him running aft, they jumped up after him, but they held off when they saw that I had caught him. By and by, the man who had spoken to

me before told me what had happened. He was a stocky little chap, with a red head.

"Well," he said, "there isn't much to tell. Jack Benton had been eating his supper with the rest of us. He always sits at the after corner of the table, on the port side. His brother used to sit at the end, next him. The doctor gave him a thundering big piece of pie to finish up with, and when he had finished he didn't stop for a smoke, but went off quick to relieve the wheel. Just as he had gone, the doctor came in from the galley, and when he saw Jack's empty plate he stood stock still staring at it; and we all wondered what was the matter, till we looked at the plate. There were two forks in it, sir, lying side by side. Then the doctor grabbed his knife, and flew up through the hatch like a rocket. The other fork was there all right, Mr. Torkeldsen, for we all saw it and handled it; and we all had our own. That's all I know."

I didn't feel that I wanted to laugh when he told me that story; but I hoped the old man wouldn't hear it, for I knew he wouldn't believe it, and no captain that ever sailed likes to have stories like that going round about his ship. It gives her a bad name. But that was all anybody ever saw except the cook, and he isn't the first man who has thought he saw things without having any drink in him. I think, if the doctor had been weak in the head as he was afterwards, he might have done something foolish again, and there might have been serious trouble. But he didn't. Only, two or three times I saw him looking at Jack Benton in a queer, scared way, and once I heard him talking to himself.

"There's two of them! So help me God, there's two of them!"

He didn't say anything more about asking for his discharge, but I knew well enough that if he got ashore at the next port we should never see him again, if he had to leave his kit behind him, and his money, too. He was scared all through, for good and all; and he wouldn't be right again till he got another ship. It's no use to talk to a man when he gets like that, any more than it is to send a boy to the main truck when he has lost his nerve.

Jack Benton never spoke of what happened that evening. I don't know whether he knew about the two forks, or not; or whether he understood what the trouble was. Whatever he knew from the other men, he was evidently living under a hard strain. He was quiet enough, and too quiet; but his face was set, and sometimes it twitched oddly when he was at the wheel, and he would turn his head round sharp to look behind him. A man doesn't do that naturally, unless

there's a vessel that he thinks is creeping up on the quarter. When that happens, if the man at the wheel takes a pride in his ship, he will almost always keep glancing over his shoulder to see whether the other fellow is gaining. But Jack Benton used to look round when there was nothing there; and what is curious, the other men seemed to catch the trick when they were steering. One day the old man turned out just as the man at the wheel looked behind him.

"What are you looking at?" asked the captain.

"Nothing, sir," answered the man.

"Then keep your eye on the mizzen-royal," said the old man, as if he were forgetting that we weren't a square-rigger.

"Ay, ay, sir," said the man.

The captain told me to go below and work up the latitude from the dead-reckoning, and he went forward of the deck-house and sat down to read, as he often did. When I came up, the man at the wheel was looking round again, and I stood beside him and just asked him quietly what everybody was looking at, for it was getting to be a general habit. He wouldn't say anything at first, but just answered that it was nothing. But when he saw that I didn't seem to care, and just stood there as if there were nothing more to be said, he naturally began to talk.

He said that it wasn't that he saw anything, because there wasn't anything to see except the spanker sheet just straining a little, and working in the sheaves of the blocks as the schooner rose to the short seas. There wasn't anything to be seen, but it seemed to him that the sheet made a queer noise in the blocks. It was a new manilla sheet; and in dry weather it did make a little noise, something between a creak and a wheeze. I looked at it and looked at the man, and said nothing; and presently he went on. He asked me if I didn't notice anything peculiar about the noise. I listened awhile, and said I didn't notice anything. Then he looked rather sheepish, but said he didn't think it could be his own ears, because every man who steered his trick heard the same thing now and then,—sometimes once in a day, sometimes once in a night, sometimes it would go on a whole hour.

"It sounds like sawing wood," I said, just like that.

"To us it sounds a good deal more like a man whistling 'Nancy Lee.'" He started nervously as he spoke the last words. "There, sir, don't you hear it?" he asked

suddenly.

I heard nothing but the creaking of the manilla sheet. It was getting near noon, and fine, clear weather in southern waters,—just the sort of day and the time when you would least expect to feel creepy. But I remembered how I had heard that same tune overhead at night in a gale of wind a fortnight earlier, and I am not ashamed to say that the same sensation came over me now, and I wished myself well out of the *Helen B.*, and aboard of any old cargo-dragger, with a windmill on deck, and an eighty-nine-forty-eighter for captain, and a fresh leak whenever it breezed up.

Little by little during the next few days life on board that vessel came to be about as unbearable as you can imagine. It wasn't that there was much talk, for I think the men were shy even of speaking to each other freely about what they thought. The whole ship's company grew silent, until one hardly ever heard a voice, except giving an order and the answer. The men didn't sit over their meals when their watch was below, but either turned in at once or sat about on the forecastle smoking their pipes without saying a word. We were all thinking of the same thing. We all felt as if there were a hand on board, sometimes below, sometimes about decks, sometimes aloft, sometimes on the boom end; taking his full share of what the others got, but doing no work for it. We didn't only feel it, we knew it. He took up no room, he cast no shadow, and we never heard his footfall on deck; but he took his whack with the rest as regular as the bells, and—he whistled "Nancy Lee." It was like the worst sort of dream you can imagine; and I dare say a good many of us tried to believe it was nothing else sometimes, when we stood looking over the weather rail in fine weather with the breeze in our faces; but if we happened to turn round and look into each other's eyes, we knew it was something worse than any dream could be; and we would turn away from each other with a queer, sick feeling, wishing that we could just for once see somebody who didn't know what we knew.

There's not much more to tell about the *Helen B. Jackson* so far as I am concerned. We were more like a shipload of lunatics than anything else when we ran in under Morro Castle, and anchored in Havana. The cook had brain fever, and was raving mad in his delirium; and the rest of the men weren't far from the same state. The last three or four days had been awful, and we had been as near to having a mutiny on board as I ever want to be. The men didn't want to hurt anybody; but they wanted to get away out of that ship, if they had to swim for it; to get away from that whistling, from that dead shipmate who had come back, and who filled the ship with his unseen self. I know that if the old man and I

hadn't kept a sharp lookout the men would have put a boat over quietly on one of those calm nights, and pulled away, leaving the captain and me and the mad cook to work the schooner into harbour. We should have done it somehow, of course, for we hadn't far to run if we could get a breeze; and once or twice I found myself wishing that the crew were really gone, for the awful state of fright in which they lived was beginning to work on me too. You see I partly believed and partly didn't; but anyhow I didn't mean to let the thing get the better of me, whatever it was. I turned crusty, too, and kept the men at work on all sorts of jobs, and drove them to it until they wished I was overboard, too. It wasn't that the old man and I were trying to drive them to desert without their pay, as I am sorry to say a good many skippers and mates do, even now. Captain Hackstaff was as straight as a string, and I didn't mean those poor fellows should be cheated out of a single cent; and I didn't blame them for wanting to leave the ship, but it seemed to me that the only chance to keep everybody sane through those last days was to work the men till they dropped. When they were dead tired they slept a little, and forgot the thing until they had to tumble up on deck and face it again. That was a good many years ago. Do you believe that I can't hear "Nancy Lee" now, without feeling cold down my back? For I heard it too, now and then, after the man had explained why he was always looking over his shoulder. Perhaps it was imagination. I don't know. When I look back it seems to me that I only remember a long fight against something I couldn't see, against an appalling presence, against something worse than cholera or Yellow Jack or the plague—and goodness knows the mildest of them is bad enough when it breaks out at sea. The men got as white as chalk, and wouldn't go about decks alone at night, no matter what I said to them. With the cook raving in his bunk the forecabin would have been a perfect hell, and there wasn't a spare cabin on board. There never is on a fore-and-after. So I put him into mine, and he was more quiet there, and at last fell into a sort of stupor as if he were going to die. I don't know what became of him, for we put him ashore alive and left him in the hospital.

The men came aft in a body, quiet enough, and asked the captain if he wouldn't pay them off, and let them go ashore. Some men wouldn't have done it, for they had shipped for the voyage, and had signed articles. But the captain knew that when sailors get an idea into their heads they're no better than children; and if he forced them to stay aboard he wouldn't get much work out of them, and couldn't rely on them in a difficulty. So he paid them off, and let them go. When they had gone forward to get their kits, he asked me whether I wanted to go too, and for a minute I had a sort of weak feeling that I might just as well. But I didn't, and he

was a good friend to me afterwards. Perhaps he was grateful to me for sticking to him.

When the men went off he didn't come on deck; but it was my duty to stand by while they left the ship. They owed me a grudge for making them work during the last few days, and most of them dropped into the boat without so much as a word or a look, as sailors will. Jack Benton was the last to go over the side, and he stood still a minute and looked at me, and his white face twitched. I thought he wanted to say something.

"Take care of yourself, Jack," said I. "So long!"

It seemed as if he couldn't speak for two or three seconds; then his words came thick.

"It wasn't my fault, Mr. Torkeldsen. I swear it wasn't my fault!"

That was all; and he dropped over the side, leaving me to wonder what he meant.

The captain and I stayed on board, and the ship-chandler got a West India boy to cook for us.

That evening, before turning in, we were standing by the rail having a quiet smoke, watching the lights of the city, a quarter of a mile off, reflected in the still water. There was music of some sort ashore, in a sailors' dance-house, I dare say; and I had no doubt that most of the men who had left the ship were there, and already full of jiggy-jiggy. The music played a lot of sailors' tunes that ran into each other, and we could hear the men's voices in the chorus now and then. One followed another, and then it was "Nancy Lee," loud and clear, and the men singing "Yo-ho, heave-ho!"

"I have no ear for music," said Captain Hackstaff, "but it appears to me that's the tune that man was whistling the night we lost the man overboard. I don't know why it has stuck in my head, and of course it's all nonsense; but it seems to me that I have heard it all the rest of the trip."

I didn't say anything to that, but I wondered just how much the old man had understood. Then we turned in, and I slept ten hours without opening my eyes.

I stuck to the *Helen B. Jackson* after that as long as I could stand a fore-and-after; but that night when we lay in Havana was the last time I ever heard "Nancy Lee" on board of her. The spare hand had gone ashore with the rest, and

he never came back, and he took his tune with him; but all those things are just as clear in my memory as if they had happened yesterday.

After that I was in deep water for a year or more, and after I came home I got my certificate, and what with having friends and having saved a little money, and having had a small legacy from an uncle in Norway, I got the command of a coastwise vessel, with a small share in her. I was at home three weeks before going to sea, and Jack Benton saw my name in the local papers, and wrote to me.

He said that he had left the sea, and was trying farming, and he was going to be married, and he asked if I wouldn't come over for that, for it wasn't more than forty minutes by train; and he and Mamie would be proud to have me at the wedding. I remembered how I had heard one brother ask the other whether Mamie knew. That meant, whether she knew he wanted to marry her, I suppose. She had taken her time about it, for it was pretty nearly three years then since we had lost Jim Benton overboard.

I had nothing particular to do while we were getting ready for sea; nothing to prevent me from going over for a day, I mean; and I thought I'd like to see Jack Benton, and have a look at the girl he was going to marry. I wondered whether he had grown cheerful again, and had got rid of that drawn look he had when he told me it wasn't his fault. How could it have been his fault, anyhow? So I wrote to Jack that I would come down and see him married; and when the day came I took the train, and got there about ten o'clock in the morning. I wish I hadn't. Jack met me at the station, and he told me that the wedding was to be late in the afternoon, and that they weren't going off on any silly wedding trip, he and Mamie, but were just going to walk home from her mother's house to his cottage. That was good enough for him, he said. I looked at him hard for a minute after we met. When we had parted I had a sort of idea that he might take to drink, but he hadn't. He looked very respectable and well-to-do in his black coat and high city collar; but he was thinner and bonier than when I had known him, and there were lines in his face, and I thought his eyes had a queer look in them, half shifty, half scared. He needn't have been afraid of me, for I didn't mean to talk to his bride about the *Helen B. Jackson*.

He took me to his cottage first, and I could see that he was proud of it. It wasn't above a cable's-length from high-water mark, but the tide was running out, and there was already a broad stretch of hard wet sand on the other side of the beach road. Jack's bit of land ran back behind the cottage about a quarter of a mile, and he said that some of the trees we saw were his. The fences were neat and well

kept, and there was a fair-sized barn a little way from the cottage, and I saw some nice-looking cattle in the meadows; but it didn't look to me to be much of a farm, and I thought that before long Jack would have to leave his wife to take care of it, and go to sea again. But I said it was a nice farm, so as to seem pleasant, and as I don't know much about these things I dare say it was, all the same. I never saw it but that once. Jack told me that he and his brother had been born in the cottage, and that when their father and mother died they leased the land to Mamie's father, but had kept the cottage to live in when they came home from sea for a spell. It was as neat a little place as you would care to see: the floors as clean as the decks of a yacht, and the paint as fresh as a man-o'-war. Jack always was a good painter. There was a nice parlour on the ground floor, and Jack had papered it and had hung the walls with photographs of ships and foreign ports, and with things he had brought home from his voyages: a boomerang, a South Sea club, Japanese straw hats and a Gibraltar fan with a bull-fight on it, and all that sort of gear. It looked to me as if Miss Mamie had taken a hand in arranging it. There was a brand-new polished iron Franklin stove set into the old fireplace, and a red table-cloth from Alexandria, embroidered with those outlandish Egyptian letters. It was all as bright and homelike as possible, and he showed me everything, and was proud of everything, and I liked him the better for it. But I wished that his voice would sound more cheerful, as it did when we first sailed in the *Helen B.*, and that the drawn look would go out of his face for a minute. Jack showed me everything, and took me upstairs, and it was all the same: bright and fresh and ready for the bride. But on the upper landing there was a door that Jack didn't open. When we came out of the bedroom I noticed that it was ajar, and Jack shut it quickly and turned the key.

"That lock's no good," he said, half to himself. "The door is always open."

I didn't pay much attention to what he said, but as we went down the short stairs, freshly painted and varnished so that I was almost afraid to step on them, he spoke again.

"That was his room, sir. I have made a sort of store-room of it."

"You may be wanting it in a year or so," I said, wishing to be pleasant.

"I guess we won't use his room for that," Jack answered in a low voice.

Then he offered me a cigar from a fresh box in the parlour, and he took one, and we lit them, and went out; and as we opened the front door there was Mamie Brewster standing in the path as if she were waiting for us. She was a fine-

looking girl, and I didn't wonder that Jack had been willing to wait three years for her. I could see that she hadn't been brought up on steam-heat and cold storage, but had grown into a woman by the sea-shore. She had brown eyes, and fine brown hair, and a good figure.

"This is Captain Torkeldsen," said Jack. "This is Miss Brewster, captain; and she is glad to see you."

"Well, I am," said Miss Mamie, "for Jack has often talked to us about you, captain."

She put out her hand, and took mine and shook it heartily, and I suppose I said something, but I know I didn't say much.

The front door of the cottage looked toward the sea, and there was a straight path leading to the gate on the beach road. There was another path from the steps of the cottage that turned to the right, broad enough for two people to walk easily, and it led straight across the fields through gates to a larger house about a quarter of a mile away. That was where Mamie's mother lived, and the wedding was to be there. Jack asked me whether I would like to look round the farm before dinner, but I told him I didn't know much about farms. Then he said he just wanted to look round himself a bit, as he mightn't have much more chance that day; and he smiled, and Mamie laughed.

"Show the captain the way to the house, Mamie," he said. "I'll be along in a minute."

So Mamie and I began to walk along the path, and Jack went up toward the barn.

"It was sweet of you to come, captain," Miss Mamie began, "for I have always wanted to see you."

"Yes," I said, expecting something more.

"You see, I always knew them both," she went on. "They used to take me out in a dory to catch codfish when I was a little girl, and I liked them both," she added thoughtfully. "Jack doesn't care to talk about his brother now. That's natural. But you won't mind telling me how it happened, will you? I should so much like to know."

Well, I told her about the voyage and what happened that night when we fell in with a gale of wind, and that it hadn't been anybody's fault, for I wasn't going to

admit that it was my old captain's, if it was. But I didn't tell her anything about what happened afterwards. As she didn't speak, I just went on talking about the two brothers, and how like they had been, and how when poor Jim was drowned and Jack was left, I took Jack for him. I told her that none of us had ever been sure which was which.

"I wasn't always sure myself," she said, "unless they were together. Leastways, not for a day or two after they came home from sea. And now it seems to me that Jack is more like poor Jim, as I remember him, than he ever was, for Jim was always more quiet, as if he were thinking."

I told her I thought so, too. We passed the gate and went into the next field, walking side by side. Then she turned her head to look for Jack, but he wasn't in sight. I sha'n't forget what she said next.

"Are you sure now?" she asked.

I stood stock-still, and she went on a step, and then turned and looked at me. We must have looked at each other while you could count five or six.

"I know it's silly," she went on, "it's silly, and it's awful, too, and I have got no right to think it, but sometimes I can't help it. You see it was always Jack I meant to marry."

"Yes," I said stupidly, "I suppose so."

She waited a minute, and began walking on slowly before she went on again.

"I am talking to you as if you were an old friend, captain, and I have only known you five minutes. It was Jack I meant to marry, but now he is so like the other one."

When a woman gets a wrong idea into her head, there is only one way to make her tired of it, and that is to agree with her. That's what I did, and she went on talking the same way for a little while, and I kept on agreeing and agreeing until she turned round on me.

"You know you don't believe what you say," she said, and laughed. "You know that Jack is Jack, right enough; and it's Jack I am going to marry."

Of course I said so, for I didn't care whether she thought me a weak creature or not. I wasn't going to say a word that could interfere with her happiness, and I

didn't intend to go back on Jack Benton; but I remembered what he had said when he left the ship in Havana: that it wasn't his fault.

"All the same," Miss Mamie went on, as a woman will, without realising what she was saying, "all the same, I wish I had seen it happen. Then I should know."

Next minute she knew that she didn't mean that, and was afraid that I would think her heartless, and began to explain that she would really rather have died herself than have seen poor Jim go overboard. Women haven't got much sense, anyhow. All the same, I wondered how she could marry Jack if she had a doubt that he might be Jim after all. I suppose she had really got used to him since he had given up the sea and had stayed ashore, and she cared for him.

Before long we heard Jack coming up behind us, for we had walked very slowly to wait for him.

"Promise not to tell anybody what I said, captain," said Mamie, as girls do as soon as they have told their secrets.

Anyhow, I know I never did tell any one but you. This is the first time I have talked of all that, the first time since I took the train from that place. I am not going to tell you all about the day. Miss Mamie introduced me to her mother, who was a quiet, hard-faced old New England farmer's widow, and to her cousins and relations; and there were plenty of them too at dinner, and there was the parson besides. He was what they call a Hard-shell Baptist in those parts, with a long, shaven upper lip and a whacking appetite, and a sort of superior look, as if he didn't expect to see many of us hereafter—the way a New York pilot looks round, and orders things about when he boards an Italian cargo-dragger, as if the ship weren't up to much anyway, though it was his business to see that she didn't get aground. That's the way a good many parsons look, I think. He said grace as if he were ordering the men to sheet home the topgallant-sail and get the helm up. After dinner we went out on the piazza, for it was warm autumn weather; and the young folks went off in pairs along the beach road, and the tide had turned and was beginning to come in. The morning had been clear and fine, but by four o'clock it began to look like a fog, and the damp came up out of the sea and settled on everything. Jack said he'd go down to his cottage and have a last look, for the wedding was to be at five o'clock, or soon after, and he wanted to light the lights, so as to have things look cheerful.

"I will just take a last look," he said again, as we reached the house. We went in, and he offered me another cigar, and I lit it and sat down in the parlour. I could

hear him moving about, first in the kitchen and then upstairs, and then I heard him in the kitchen again; and then before I knew anything I heard somebody moving upstairs again. I knew he couldn't have got up those stairs as quick as that. He came into the parlour, and he took a cigar himself, and while he was lighting it I heard those steps again overhead. His hand shook, and he dropped the match.

"Have you got in somebody to help?" I asked.

"No," Jack answered sharply, and struck another match.

"There's somebody upstairs, Jack," I said. "Don't you hear footsteps?"

"It's the wind, captain," Jack answered; but I could see he was trembling.

"That isn't any wind, Jack," I said; "it's still and foggy. I'm sure there's somebody upstairs."

"If you are so sure of it, you'd better go and see for yourself, captain," Jack answered, almost angrily.

He was angry because he was frightened. I left him before the fireplace, and went upstairs. There was no power on earth that could make me believe I hadn't heard a man's footsteps overhead. I knew there was somebody there. But there wasn't. I went into the bedroom, and it was all quiet, and the evening light was streaming in, reddish through the foggy air; and I went out on the landing and looked in the little back room that was meant for a servant girl or a child. And as I came back again I saw that the door of the other room was wide open, though I knew Jack had locked it. He had said the lock was no good. I looked in. It was a room as big as the bedroom, but almost dark, for it had shutters, and they were closed. There was a musty smell, as of old gear, and I could make out that the floor was littered with sea chests, and that there were oilskins and stuff piled on the bed. But I still believed that there was somebody upstairs, and I went in and struck a match and looked round. I could see the four walls and the shabby old paper, an iron bed and a cracked looking-glass, and the stuff on the floor. But there was nobody there. So I put out the match, and came out and shut the door and turned the key. Now, what I am telling you is the truth. When I had turned the key, I heard footsteps walking away from the door inside the room. Then I felt queer for a minute, and when I went downstairs I looked behind me, as the men at the wheel used to look behind them on board the *Helen B.*

Jack was already outside on the steps, smoking. I have an idea that he didn't like to stay inside alone.

"Well?" he asked, trying to seem careless.

"I didn't find anybody," I answered, "but I heard somebody moving about."

"I told you it was the wind," said Jack, contemptuously. "I ought to know, for I live here, and I hear it often."

There was nothing to be said to that, so we began to walk down toward the beach. Jack said there wasn't any hurry, as it would take Miss Mamie some time to dress for the wedding. So we strolled along, and the sun was setting through the fog, and the tide was coming in. I knew the moon was full, and that when she rose the fog would roll away from the land, as it does sometimes. I felt that Jack didn't like my having heard that noise, so I talked of other things, and asked him about his prospects, and before long we were chatting as pleasantly as possible.

I haven't been at many weddings in my life, and I don't suppose you have, but that one seemed to me to be all right until it was pretty near over; and then, I don't know whether it was part of the ceremony or not, but Jack put out his hand and took Mamie's and held it a minute, and looked at her, while the parson was still speaking.

Mamie turned as white as a sheet and screamed. It wasn't a loud scream, but just a sort of stifled little shriek, as if she were half frightened to death; and the parson stopped, and asked her what was the matter, and the family gathered round.

"Your hand's like ice," said Mamie to Jack, "and it's all wet!"

She kept looking at it, as she got hold of herself again.

"It don't feel cold to me," said Jack, and he held the back of his hand against his cheek. "Try it again."

Mamie held out hers, and touched the back of his hand, timidly at first, and then took hold of it.

"Why, that's funny," she said.

"She's been as nervous as a witch all day," said Mrs. Brewster, severely.

"It is natural," said the parson, "that young Mrs. Benton should experience a little agitation at such a moment."

Most of the bride's relations lived at a distance, and were busy people, so it had been arranged that the dinner we'd had in the middle of the day was to take the place of a dinner afterwards, and that we should just have a bite after the wedding was over, and then that everybody should go home, and the young couple would walk down to the cottage by themselves. When I looked out I could see the light burning brightly in Jack's cottage, a quarter of a mile away. I said I didn't think I could get any train to take me back before half-past nine, but Mrs. Brewster begged me to stay until it was time, as she said her daughter would want to take off her wedding dress before she went home; for she had put on something white with a wreath, that was very pretty, and she couldn't walk home like that, could she?

So when we had all had a little supper the party began to break up, and when they were all gone Mrs. Brewster and Mamie went upstairs, and Jack and I went out on the piazza, to have a smoke, as the old lady didn't like tobacco in the house.

The full moon had risen now, and it was behind me as I looked down toward Jack's cottage, so that everything was clear and white, and there was only the light burning in the window. The fog had rolled down to the water's edge, and a little beyond, for the tide was high, or nearly, and was lapping up over the last reach of sand, within fifty feet of the beach road.

Jack didn't say much as we sat smoking, but he thanked me for coming to his wedding, and I told him I hoped he would be happy; and so I did. I dare say both of us were thinking of those footsteps upstairs, just then, and that the house wouldn't seem so lonely with a woman in it. By and by we heard Mamie's voice talking to her mother on the stairs, and in a minute she was ready to go. She had put on again the dress she had worn in the morning, and it looked black at night, almost as black as Jack's coat.

Well, they were ready to go now. It was all very quiet after the day's excitement, and I knew they would like to walk down that path alone now that they were man and wife at last. I bade them good-night, although Jack made a show of pressing me to go with them by the path as far as the cottage, instead of going to the station by the beach road. It was all very quiet, and it seemed to me a sensible way of getting married; and when Mamie kissed her mother good-night

I just looked the other way, and knocked my ashes over the rail of the piazza. So they started down the straight path to Jack's cottage, and I waited a minute with Mrs. Brewster, looking after them, before taking my hat to go. They walked side by side, a little shyly at first, and then I saw Jack put his arm round her waist. As I looked he was on her left, and I saw the outline of the two figures very distinctly against the moonlight on the path; and the shadow on Mamie's right was broad and black as ink, and it moved along, lengthening and shortening with the unevenness of the ground beside the path.

I thanked Mrs. Brewster, and bade her good-night; and though she was a hard New England woman her voice trembled a little as she answered, but being a sensible person she went in and shut the door behind her as I stepped out on the path. I looked after the couple in the distance a last time, meaning to go down to the road, so as not to overtake them; but when I had made a few steps I stopped and looked again, for I knew I had seen something queer, though I had only realised it afterwards. I looked again, and it was plain enough now; and I stood stock-still, staring at what I saw. Mamie was walking between two men. The second man was just the same height as Jack, both being about a half a head taller than she; Jack on her left in his black tail-coat and round hat, and the other man on her right—well, he was a sailor-man in wet oilskins. I could see the moonlight shining on the water that ran down him, and on the little puddle that had settled where the flap of his sou'wester was turned up behind: and one of his wet, shiny arms was round Mamie's waist, just above Jack's. I was fast to the spot where I stood, and for a minute I thought I was crazy. We'd had nothing but some cider for dinner, and tea in the evening, otherwise I'd have thought something had got into my head, though I was never drunk in my life. It was more like a bad dream after that.

I was glad Mrs. Brewster had gone in. As for me, I couldn't help following the three, in a sort of wonder to see what would happen, to see whether the sailor-man in his wet togs would just melt away into the moonshine. But he didn't.

One of his wet, shiny arms was round Mamie's waist.

**ONE OF HIS WET, SHINY ARMS WAS ROUND MAMIE'S WAIST.**

---

I moved slowly, and I remembered afterwards that I walked on the grass, coming. I suppose it all happened in less than five minutes after that, but it

seemed as if it must have taken an hour. Neither Jack nor Mamie seemed to notice the sailor. She didn't seem to know that his wet arm was round her, and little by little they got near the cottage, and I wasn't a hundred yards from them when they reached the door. Something made me stand still then. Perhaps it was fright, for I saw everything that happened just as I see you now.

Mamie set her foot on the step to go up, and as she went forward I saw the sailor slowly lock his arm in Jack's, and Jack didn't move to go up. Then Mamie turned round on the step, and they all three stood that way for a second or two. She cried out then,—I heard a man cry like that once, when his arm was taken off by a steam-crane,—and she fell back in a heap on the little piazza.

I tried to jump forward, but I couldn't move, and I felt my hair rising under my hat. The sailor turned slowly where he stood, and swung Jack round by the arm steadily and easily, and began to walk him down the pathway from the house. He walked him straight down that path, as steadily as Fate; and all the time I saw the moonlight shining on his wet oilskins. He walked him through the gate, and across the beach road, and out upon the wet sand, where the tide was high. Then I got my breath with a gulp, and ran for them across the grass, and vaulted over the fence, and stumbled across the road. But when I felt the sand under my feet, the two were at the water's edge; and when I reached the water they were far out, and up to their waists; and I saw that Jack Benton's head had fallen forward on his breast, and his free arm hung limp beside him, while his dead brother steadily marched him to his death. The moonlight was on the dark water, but the fog-bank was white beyond, and I saw them against it; and they went slowly and steadily down. The water was up to their armpits, and then up to their shoulders, and then I saw it rise up to the black rim of Jack's hat. But they never wavered; and the two heads went straight on, straight on, till they were under, and there was just a ripple in the moonlight where Jack had been.

It has been on my mind to tell you that story, whenever I got a chance. You have known me, man and boy, a good many years; and I thought I would like to hear your opinion. Yes, that's what I always thought. It wasn't Jim that went overboard; it was Jack, and Jim just let him go when he might have saved him; and then Jim passed himself off for Jack with us, and with the girl. If that's what happened, he got what he deserved. People said the next day that Mamie found it out as they reached the house, and that her husband just walked out into the sea, and drowned himself; and they would have blamed me for not stopping him if they'd known that I was there. But I never told what I had seen, for they wouldn't have believed me. I just let them think I had come too late.

When I reached the cottage and lifted Mamie up, she was raving mad. She got better afterwards, but she was never right in her head again.

Oh, you want to know if they found Jack's body? I don't know whether it was his, but I read in a paper at a Southern port where I was with my new ship that two dead bodies had come ashore in a gale down East, in pretty bad shape. They were locked together, and one was a skeleton in oilskins.

---

FRANCIS MARION CRAWFORD the youngest of the four children of the well-known sculptor Thomas Crawford, was born in Rome, educated by a French governess; then at St Paul's School, Concord, N.H.; in the quiet country village of Hatfield Regis, under an English tutor; at Trinity College, Cambridge, where they thought him a mathematician in those days; at Heidelberg and Karlsruhe, and at the University of Rome, where a special interest in Oriental languages sent him to India with the idea of preparing for a professorship.

At one time in India hard times nearly forced him into enlistment in the British army, but a chance opening sent him as editor of the *Indian Herald* to Allahabad. It was during the next eighteen months that he met at Simla the hero of his first novel, "Mr. Isaacs." "If it had not been for him," Mr. Crawford has been known to say, "I might at this moment be a professor of Sanskrit in some American college;" for that idea persisted after his return to the United States, where he entered Harvard for special study of the subject.

But from the May evening when the story of the interesting man at Simla was first told in a club smoking-room overlooking Madison Square, Mr. Crawford's life has been one of hard literary work. He returned to Italy in 1883, spent most of the next year in Constantinople, where he was married to a daughter of General Berdan. From 1885 he has made his home in Sorrento, Italy, visiting America at intervals.

"Mr. Isaacs," published in 1882, was followed almost at once by "Dr. Claudius." Then *The Atlantic Monthly* claimed a serial, "A Roman Singer," in 1883. Since that time the list of his novels has been increased to thirty-two, besides the historical and descriptive works entitled "Ave Roma Immortalis" and "The Rulers of the South."

To Mr. Crawford, the development of a story and of the character which

suggested it, is the preëminent thing. As the critics say:—

"He is an artist, a born story-teller and colourist, imaginative and dramatic, virile and vivid."

His wide range as a traveller has contributed doubtless to another characteristic quality:—

"... his strength in unexcelled portraits of odd characters and his magical skill in seeming to make his readers witnesses of the spectacles."

His intimate knowledge of many countries has resulted in an unequalled series of brilliant romances, including varied characters from the old families of Rome, the glassblowers of Venice, the silversmiths of Rome, the cigarette makers of Munich, the court of old Madrid, the Turks of Stamboul and the Bosphorus, simple sailors on the coast of Spain, Americans of modern New York and Bar Harbor, to Crusaders of the twelfth century. But whether the scene be in modern India, rural England, the Black Forest, or the palaces of Babylon, the story seizes on the imagination and fascinates the reader.

"The romantic reader will find here a tale of love passionate and pure; the student of character, the subtle analysis and deft portrayal he loves; the historian will approve its conscientious historic accuracy; the lover of adventure will find his blood stir and pulses quicken as he reads."

scanned images of public domain material from the Google  
Print project.)

Updated editions will replace the previous one--the old editions  
will be renamed.

Creating the works from public domain print editions means that no  
one owns a United States copyright in these works, so the Foundation  
(and you!) can copy and distribute it in the United States without  
permission and without paying copyright royalties. Special rules,  
set forth in the General Terms of Use part of this license, apply to  
copying and distributing Project Gutenberg-tm electronic works to  
protect the PROJECT GUTENBERG-tm concept and trademark. Project  
Gutenberg is a registered trademark, and may not be used if you  
charge for the eBooks, unless you receive specific permission. If you  
do not charge anything for copies of this eBook, complying with the  
rules is very easy. You may use this eBook for nearly any purpose  
such as creation of derivative works, reports, performances and  
research. They may be modified and printed and given away--you may do  
practically ANYTHING with public domain eBooks. Redistribution is  
subject to the trademark license, especially commercial  
redistribution.

\*\*\* START: FULL LICENSE \*\*\*

THE FULL PROJECT GUTENBERG LICENSE  
PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg-tm mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase "Project Gutenberg"), you agree to comply with all the terms of the Full Project Gutenberg-tm License (available with this file or online at <http://gutenberg.org/license>).

## Section 1. General Terms of Use and Redistributing Project Gutenberg-tm electronic works

1.A. By reading or using any part of this Project Gutenberg-tm electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg-tm electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg-tm electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. "Project Gutenberg" is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg-tm electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg-tm electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg-tm electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation ("the Foundation" or PGLAF), owns a compilation copyright in the collection of Project Gutenberg-tm electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is in the public domain in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg-tm mission of promoting free access to electronic works by freely sharing Project Gutenberg-tm works in compliance with the terms of this agreement for keeping the Project Gutenberg-tm name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg-tm License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg-tm work. The Foundation makes no representations concerning the copyright status of any work in any country outside the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg-tm License must appear prominently whenever any copy of a Project Gutenberg-tm work (any work on which the

phrase "Project Gutenberg" appears, or with which the phrase "Project Gutenberg" is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at [www.gutenberg.org](http://www.gutenberg.org)

1.E.2. If an individual Project Gutenberg-tm electronic work is derived from the public domain (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase "Project Gutenberg" associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg-tm trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg-tm electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg-tm License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg-tm License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg-tm.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg-tm License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg-tm work in a format other than "Plain Vanilla ASCII" or other format used in the official version posted on the official Project Gutenberg-tm web site ([www.gutenberg.org](http://www.gutenberg.org)), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original "Plain Vanilla ASCII" or other form. Any alternate format must include the full Project Gutenberg-tm License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg-tm works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg-tm electronic works provided that

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg-tm works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg-tm trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you

prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."

- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg-tm License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg-tm works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg-tm works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg-tm electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from both the Project Gutenberg Literary Archive Foundation and Michael Hart, the owner of the Project Gutenberg-tm trademark. Contact the Foundation as set forth in Section 3 below.

#### 1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread public domain works in creating the Project Gutenberg-tm collection. Despite these efforts, Project Gutenberg-tm electronic works, and the medium on which they may be stored, may contain "Defects," such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the "Right of Replacement or Refund" described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg-tm trademark, and any other party distributing a Project Gutenberg-tm electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH F3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity

providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS' WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg-tm electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg-tm electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg-tm work, (b) alteration, modification, or additions or deletions to any Project Gutenberg-tm work, and (c) any Defect you cause.

## Section 2. Information about the Mission of Project Gutenberg-tm

Project Gutenberg-tm is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need, is critical to reaching Project Gutenberg-tm's goals and ensuring that the Project Gutenberg-tm collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg-tm and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation web page at <http://www.pgla.org>.

## Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Its 501(c)(3) letter is posted at <http://pglaf.org/fundraising>. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's principal office is located at 4557 Melan Dr. S. Fairbanks, AK, 99712., but its volunteers and employees are scattered throughout numerous locations. Its business office is located at

809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887, email [business@pglaf.org](mailto:business@pglaf.org). Email contact links and up to date contact information can be found at the Foundation's web site and official page at <http://pglaf.org>

For additional contact information:

Dr. Gregory B. Newby  
Chief Executive and Director  
[gbnewby@pglaf.org](mailto:gbnewby@pglaf.org)

#### Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg-tm depends upon and cannot survive without wide spread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit <http://pglaf.org>

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg Web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: <http://pglaf.org/donate>

#### Section 5. General Information About Project Gutenberg-tm electronic works.

Professor Michael S. Hart is the originator of the Project Gutenberg-tm concept of a library of electronic works that could be freely shared with anyone. For thirty years, he produced and distributed Project Gutenberg-tm eBooks with only a loose network of volunteer support.

Project Gutenberg-tm eBooks are often created from several printed editions, all of which are confirmed as Public Domain in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our Web site which has the main PG search facility:

<http://www.gutenberg.org>

This Web site includes information about Project Gutenberg-tm, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
